Revit® Architecture 2010 Tutorial Series

270 Video tutorials for the New or Upgrading User

Your instructor, Lay Christopher Fox, is an independent architectural drafter/illustrator, author, and educator. He is the author of *Introducing and Implementing Revit Architecture*, by Autodesk Press. He has produced Autodesk Official Training Courseware on Revit Architecture and Revit Structure. He is the Revit Technical Editor for AUGI WORLD Magazine.

Topics covered:

Prerequisites:

Requirements:

Disk version requires Windows XP or higher.
Internet Explorer 6.0+ Browser
Adobe Flash Player
DVD Drive
Pointing device
5 GB Drive Space

Online versions need only a high speed Internet connection, a browser and Adobe® Flash.

Getting Started	Introduction
Getting Started	Getting Started
Getting Started	Opening a File
Getting Started	User Interface
Getting Started	Ribbon
Getting Started	Using the Ribbon
Getting Started	Quick Access and Application Menu
Getting Started	Project Browser
Getting Started	Options Dialog
Getting Started	Units and Snaps
Modeling 1	Introduction
Modeling 1	Drawing Aids
Modeling 1	Creating Walls by Sketch
Modeling 1	Creating Walls by Pick
Modeling 1	Modifying Wall Properties
Modeling 1	Wall Types
Modeling 1	Wall System Families
Modeling 1	Modifying Wall Profile and Adding an Opening to a Wall
Modeling 1	Curtain Wall Types
Modeling 1	Curtain Wall Components
Modeling 1	Embedding Walls
Modeling 1	Horizontal Wall Structure

Modeling 1	Create Horizontal Wall Structure
Modeling 1	Vertical Wall Structure - Regions
Modeling 1	Vertical Wall Structure - Sweeps
Modeling 1	Stacked Walls
Modeling 1	Creating Doors and Windows
Modeling 1	Door and Window Properties
Modeling 1	Levels
Modeling 1	Level Graphics
Modeling 1	Copying and Moving Objects
Modeling 1	Rotating and Arraying
Modeling 1	Resizing and Mirroring
Modeling 1	Align, Trim, Extend, Offset
Modeling 1	Grouping
Modeling 1	Grids
Modeling 1	Adding Columns
Model Views	Introduction
Model Views	Overview
Model Views	Zoom/Pan Controls
Model Views	View tab Create panel
Model Views	View tab Windows panel
Model Views	Navigation Wheels
Model Views	View Properties
Model Views	Visibility/Graphics
Model Views	View Scale and Detail Level
Model Views	Model Graphics Style
Model Views	Crop Region
Model Views	Annotation Crop Region
Model Views	Hide/Display
Model Views	View Discipline
Model Views	View Range

Model Views	Plan Regions
Model Views	Ceiling Plans
Model Views	Elevation Views
Model Views	Framing Elevations
Model Views	Section Views
Model Views	Callout Views
Model Views	Sheets
Model Views	Legends
Model Views	Camera Views
Model Views	Walkthroughs
Model Views	3D Orthographic Views
Model Views	Schedules / Quantities
Model Views	Object Styles
Model Views	View Templates
Model Views	Section Box
Model Views	Phase and Phase Filter
	Duplicate Views
Develop a Project	Introduction
Develop a Project	Object Display, Lines
Develop a Project	Project Information and Place
Develop a Project	Transfer Project Standards
Develop a Project	Project North and True North
Develop a Project	Project Templates
Dimensions and Constraints	Introduction
Dimensions and Constraints	Temporary Dimensions
Dimensions and Constraints	Permanent Dimensions
Dimensions and Constraints	Dimension Styles
Dimensions and Constraints	Equality Constraint and Lock
Dimensions and Constraints	Spot Dimensions
Dimensions and Constraints	Units

Modeling 2	Introduction
Modeling 2	Compound Structures
Modeling 2	Wall Joins
Modeling 2	Using Editing Tools with Walls
Modeling 2	Creating Floors
Modeling 2	Floor by Face
Modeling 2	Floor Properties
Modeling 2	Sloped Floors by Defines Slope
Modeling 2	Floor Openings
Modeling 2	Floor Shape Tools
Modeling 2	Floor Slab Edges
Modeling 2	Creating Ceilings
Modeling 2	Building Components in Ceilings
Modeling 2	Ceiling Openings
Modeling 2	Creating Roof by Footprint
Modeling 2	Roof - Wall Joins and Roof Shape Editing
Modeling 2	Slope Arrow
Modeling 2	Create Roof by Extrusion
Modeling 2	Align Eaves, Join Roofs
Modeling 2	Creating Fascias and Gutters
Modeling 2	Creating Soffits
Modeling 2	Roof Openings
Modeling 2	Creating Stairs
Modeling 2	Stair Type Properties
Modeling 2	Stairs with Landings
Modeling 2	Creating Stairs by Sketching Boundaries and Riser Lines
Modeling 2	Creating Spiral Stairs
Modeling 2	Multi-Story Stairs and Shafts
Modeling 2	Creating and Modifying Railings
Modeling 2	Railing Properties

Modeling 2	Creating Ramps
Modeling 2	Roof and Wall by Face
Modeling 2	Foundations
Modeling 2	Stepped Foundations
Modeling 2	Structural Beams
Modeling 2	Beam Systems
Modeling 2	Adding Structural Braces
Room and Area	Introduction
Room and Area	Rooms
Room and Area	Room Tags
Room and Area	Room Schedules
Room and Area	Room Keys and Schedules
Room and Area	Rooms and Phases
Room and Area	Areas
Room and Area	Area Types, Color Schemes and Color Fills
Room and Area	Rooms and linked models
Drafting and Detailing	Introduction
Drafting and Detailing	Detail and Drafting Views
Drafting and Detailing	Tags
Drafting and Detailing	Drafting Techniques
Drafting and Detailing	Using CAD files in Detail Views
Drafting and Detailing	Detail Components
Drafting and Detailing	Regions
Drafting and Detailing	Region Patterns
Drafting and Detailing	Text Notes
Drafting and Detailing	Text Styles
Drafting and Detailing	Reference Views
Drafting and Detailing	Annotation Details
Components and Families	Introduction
Components and Families	Loading Component Families

Components and Families	Editing Families in a Project
Components and Families	In-Place Family: Solid and Void Extrusion
Components and Families	In-Place Family: Solid Blend
Components and Families	In-Place Family: Solid Revolve
Components and Families	In-Place Family: Solid Sweep
Components and Families	In-Place Family: Lines
Components and Families	Family File Types and Templates
Massing	Introduction
Massing	Introduction to Massing, Placing Mass Elements and Mass Visibility
Massing	In-Place Mass
Massing	Solid Form with Profiles and Paths
Massing	Conceptual Mass Family
Massing	Reference Planes, Reference Lines
Massing	Reference Points
Massing	Dimensions and Parameters
Massing	Family Types
Massing	Model by Face
Massing	Using 3D CAD Files
Graphic Controls	Introduction
Graphic Controls	Creating and Using Filters
Graphic Controls	Graphic overrides
Graphic Controls	Host Layers
Graphic Controls	Site Settings - Toposurface Display
Graphic Controls	Edit Face tools
Graphic Controls	Cut Profile and Base Extension
Graphic Controls	Show Hidden and Linework
Graphic Controls	Custom Line Styles and Line Patterns
Graphic Controls	Fill Pattern Orientation and Custom Fill Patterns
Graphic Controls	Scope Box
Schedules and Tags	Introduction

Schedules and Tags	Creating a Component Schedule
Schedules and Tags	Schedule Properties Dialog
Schedules and Tags	Instance and Type Schedules
Schedules and Tags	Project Parameters in Schedules
Schedules and Tags	Schedule Appearance
Schedules and Tags	Exporting Schedules
Schedules and Tags	Drawing List View List
Schedules and Tags	Material Takeoff
Schedules and Tags	Generic Annotations
Schedules and Tags	Note Block
Schedules and Tags	Keynotes
Schedules and Tags	Material Tag
Schedules and Tags	View Reference
Schedules and Tags	Shared Parameters
Schedules and Tags	Multi Category Tag
Schedules and Tags	Multi-category Schedule
Documentation	Introduction
Documentation	Setting up Sheets
Documentation	Viewports
Documentation	Titleblocks
Documentation	Labels and Parameters in Titleblocks
Documentation	Print Setup
Documentation	Revisions
Documentation	Revision Schedules
Site Tools	Introduction
Site Tools	Create a Toposurface using Points
Site Tools	Create a Toposurface using CAD
Site Tools	Divide a Toposurface
Site Tools	Creating a Graded Region
Site Tools	Property Lines and Contour Labels

Site Tools	Parking, Site Elements and Building Pads
Site Tools	Site Settings
Leveraging Other Files	Introduction
Leveraging Other Files	File Import Raster
Leveraging Other Files	Using Imported Data for Modelling
Leveraging Other Files	Import Settings
Leveraging Other Files	File Export to CAD
Leveraging Other Files	File Export Settings
Leveraging Other Files	Export to Image
Leveraging Other Files	Modifying Imported Information
Leveraging Other Files	File Link
Leveraging Other Files	Link Visibility and Constraints
Leveraging Other Files	Links and Schedules
Leveraging Other Files	Nested Links
Leveraging Other Files	Links and Groups
Leveraging Other Files	Shared Coordinates
Leveraging Other Files	Publish Coordinates
Presentation Views	Introduction
Presentation Views	Cutaway Views
Presentation Views	Shadows and Silhouettes
Presentation Views	Animated Sun Studies
Presentation Views	Basic Rendering
Presentation Views	Rendering Settings
Presentation Views	Material Render Appearance
Presentation Views	Interior Lighting
Groups	Introduction
Groups	Create and place a Group
Groups	Editing Groups
Groups	Saving and Loading Groups
Groups	Binding and Linking Groups

Collaboration	Introduction
Collaboration	Monitor
Collaboration	Copy-Monitor
Collaboration	Coordination Review
Collaboration	Interference checking
Collaboration	ODBC Export
Collaboration	IFC Export and Import
Collaboration	Export DWF
Collaboration	Link DWF Markup
Collaboration	Export 3D CAD and DXF
Collaboration	Export to GBxml, 3ds Max, Room and Area Report
Family Creation	Introduction
Family Creation	Family Templates and Views
Family Creation	3D Modeling in Family Files: Extrusion and Blend
Family Creation	3D Modeling in Family Files: Sweep and Revolve
Family Creation	Reference Planes in Family Files
Family Creation	Reference Lines in Family files
Family Creation	Symbolic Lines and Model Lines in Family Files
Family Creation	Controls and Connectors in Family Files
Family Creation	Masking Regions in Families
Family Creation	Dimensions and Labels in Family Files
Family Creation	Family Types
Family Creation	Family Parameters and Formulas
Family Creation	Nested Families and Visibility Controls
Family Creation	Linked Parameters in Families
Family Creation	Type Catalogues
Phases	Introduction
Phases	Phases and Project Templates
Phases	Rooms, Schedules, Color Fills and Phases
Design Options	Introduction

Design Options	Setting up Design Options
Design Options	Editing Design Options
Design Options	Views and Design Options, Accept Primary
Worksets	Introduction
Worksets	Enable worksharing
Worksets	Create Worksets
Worksets	Concurrent Usage
Worksets	Working Offline and Rolling Back
