

Quick Reference:

Tech Specs for Raw Video Capture

Video Resolution: **1920x1080**

No mouse gestures/movement

No extraneous clicking

No keyboard shortcuts

If a keyboard shortcut is used, it **MUST** be verbalized for keys to be identified.

Save the file to the **raw assets** folder in SharePoint:

If using Camtasia to record your interface, save **BOTH** the .trec and .tscproj files.

For more information, see the *Customer Recording Videos Guide* and the *Customer Recording Audio Guide*.

IMPORTANT: Realize that, as you are recording, everything that you show in the interface will be seen in the video! Be aware of displaying corporate or personal information that may be sensitive in nature!

While it is possible to blur some sensitive information within the videos, this is a time-consuming post-production process that, if needed excessively, could result in additional production costs and delays in receiving your deliverables.
