

Solutions for your customer's entire employee lifecycle

Hiring

Our pre-hire assessments prove that candidates have the right skillset for the job.

Onboarding

Customer-created playlists generate just the content a new hire needs to get to work. Use assessments to eliminate the content they already know from their path to prevent redundant learning.

Upskilling

Our fully customizable roles and goals automatically surface content targeted toward the skills each employee needs to succeed in their jobs today.

Retention

Employees often leave a company when they don't have a clear path for advancement. Our individualized learning paths guide employees toward the next steps in their career.
